

ODCC TECH BULLETIN

June 24 2024 - ATTENTION ODCC MINI STOCK TEAMS

Upon review of the 2009-2010 Chevrolet Cobalt/Pontiac Pursuit/G5 allowed under ODCC rule 2.6 in the mini-stock rules we are deciding to disallow these engines as they are equipped with Variable Valve timing and proven to be over competitive.

We passed around a few ideas to keep these cars racing, but it was decided that it's better to disallow them as there's not too many on the track yet.

Teams who are racing with this engine have two weeks to switch to an older non vvt engine before they will not be allowed to compete. It will be acceptable to install an older (2005-2008) engine/wiring/computer into a 2009-2010 body.

Rule 2.6 pertaining to these cars will now read:

2005- 2008 Cobalt/Pursuit/G5 (Any 2.2L) No F35 SS Transmissions No Variable Valve Timing.
